TOP MESSAGE

Enhancing Our Capabilities as a Solution Provider and Creating New Value

As of September 1, 2026, DVx Inc. completed a business integration with OLBA HEALTHCARE HOLDINGS, Inc. and became a member of the OLBA DVx Group. Since its establishment in 1986, the Company has steadily developed as a specialized distributor in the cardiovascular field. Beginning with the sale of cardiac pacemakers and the provision of follow-up services, it has supplied medical devices used in the diagnosis and treatment of arrhythmias and ischemic heart disease. Amid the rapid changes in today's medical environment, this business integration marks a major turning point that will enable us to fulfill our long-standing mission of "contributing to medical field" more firmly and across a broader scope. By enhancing our Group-wide capabilities as a "solution provider" that delivers optimal solutions to needs in clinical settings, we are confident that we can create new value unlike anything we have provided before. The "x" in the company name DVx symbolizes "limitless possibilities and change," much like a variable in a mathematical expression. Going forward, we will work hand in hand with our new colleagues across the Group to expand those limitless possibilities even further. We will also devote ourselves to further enhancing corporate value.

Hiroshi Shibasaki, Chairman & CEO
OLBA DVx HEALTHCARE, Inc.

Paving the Way for the Future of Healthcare by Combining "Comprehensive Capabilities" and "Specialized Expertise"

Since its founding in 1921, the Group has continued to operate in close support of community healthcare, with a primary focus on the sale of medical equipment and supplies. In recent years, the healthcare environment surrounding us has been changing at an unprecedented pace, driven by factors such as the emergence of a full-fledged super-aged society, accelerating digital transformation (DX), and the use of generative AI. Never before has the question, "What role should the healthcare industry play in society?" been more important. To achieve further growth and make an even greater contribution to society, we have taken a new step forward as "OLBA DVx HEALTHCARE, Inc." This integration combines the "comprehensive capabilities" we have developed across the full spectrum of medical equipment and supplies with DVx's high level of "specialized expertise" in the cardiovascular and other fields. Furthermore, by complementing each other's sales networks, we will establish a firm position as a "comprehensive x specialized" hybrid medical device distributor. We now have a resilient business foundation that enables us to provide an even broader range of optimal solutions to the diverse needs of clinical settings in Japan and overseas. United as one Group, we will continue to take on challenges without ceasing as a leading company in the industry. With confidence, we are striving to become a sustainable enterprise that society will continue to need over the next 100 years.
